INDEX TO VOLUME V.

* Indicates Book Reviews

A

*Abbot, Charles G., The Sun, 448.

a Geminorum, *W. E. H.*, 137.

Aitken, R. G., Life on Other Worlds, 291.

Ancient and Modern, Calendars, *Albert D. Watson*, 172.

* Annuaire Astronomique de l' Observatoire Royal de Belgique, 1912, 239.

Astronomical and Astrophysical Society of America, *C. A. Chant*, 327.

Astronomical Notes, 90, 148, 232, 282, 346, 445.

Astronomical Society of India, 95.

Astronomy in Mexico, 285.

Astrophysics, Notes on, *J. S. P.*, 84; *b* Persei, *J. B. C.*, 137.

Audibility of the Aurora, C. A. C. 154.

Aurora, Mystery of the, C. A. C., 155.

B

Babylonian Astrology, E. W. Maunder, 148.

Book Reviews, 239, 448.

b Persei, *J. B. C.*, 137.

Brightness of the Night Sky, C. G. Abbot, 282.

Brooks' Comet, 284.

C

Calendars, Ancient and Modern, *Albert D. Watson*, 172.

Canals of Mars, E. M. Antoniadi, 348.

Cannon, J. B., Diameters of the Stars, 349; Note on φ Persei, 372; Orbit *b* Persei, 266.

Carson, P. A., Precise Measuring with Invar Wires; and the Measurement of Kootenay Base, 36.

Changes in Focus Produced by Plane Gratings, *Ralph E. DeLury*, 26.

Chant, C. A., Astronomical and Astrophysical Society of America, at Ottawa, 327; Great Modern Telescope, 309; Mars: The Planet of Mystery, 408; Notes and Queries, 92, 154, 240, 286, 349, 449.

Classification of the Chemical Types of Stars, Note on the, *W. Balfour Musson*, 125.

Comets, Brooks', 284; Halley's in Ceylon, 148; Regarding the Results of Observations of Halley's, D. Eginitis, 149.

D

Darwin's Tidal Theory, *A. J. Dempster*, 185.

Death of Mrs. Fleming, C. A. C., 243.

DeLury, A. T., Evolution of Worlds, 1.

DeLury, Ralph E., A Device for Guiding the Image Produced by a Cœlostat Telescope, 33; Changes in Focus Produced by Plane Gratings, 26; Errors in the Measurement of Spectral Line Displacements, 384.

Dempster, A. J., Darwin's Tidal Theory, 185.

Determination of Orbits, *L. B. Stewart*, 97.

Developments in Astronomy, Some Recent Interesting, *J. S. Plaskett*, 245.

Device for Guiding the Image Produced by a Cœlostat Telescope, *Ralph E. DeLury*, 33.

Diameter of the Stars, *J. B. Cannon*, 349.

Distribution of Globular Star Clusters, H. C. Plummer, 152.

E

Earthquake Records at Toronto and at Victoria, B.C., *J. Y.*, 89, 146, 230, 280, 344, 442.

Eclipse Cycles, W. H. S. Monck, 117.

Errors in the Measurement of Spectral Line Displacements, *Ralph E. DeLury*, 384.

Evolution of Worlds, *A. T. DeLury*, 1.

Examination Answers, C. A. C., 156, 244.

F

Fleming, Death of Mrs., C.A. C., 243.

Formation of Sunspots, Influence of Planets on the, A. Schuster, 149.

INDEX TO VOLUME V.

Evolution of Worlds, *A. T. DeLury*, 1.

Examination Answers, C. A. C., 156, 244.

F

Fleming, Death of Mrs., C.A. C., 243.

Formation of Sunspots, Influence of Planets on the, A. Schuster, 149.

G

Geminorum, α, 137; Orbit of σ, W. E. H., 200.

Globular Star Cluster, Distribution of, H. C. Plummer, 152.

Gold Medal, R.A.S.C., C. A. C., 244.

Goodacre's Map of the Moon, 156.

Great Modern Telescopes, *C. A. Chant*, 309.

H

Halley's Comet in Ceylon, 148; Regarding the Results of Observations of, D. Eginitis, 149.

Halo, A, *O. K.*, 437

Harper, W. E., Orbit of γ Orionis, 16; Orbit of σ Geminorum, 200; Spectroscopic Binary 7 Camelopardalis, 112.

Heat and Light Meteorites, Rev. M. Davidson, 233.

* History of Science, List of Books on the, 240.

I

Influence of Planets on the Formation of Sun-spots, A. Schuster, 149.

Invar Wires, Precise Measuring with, *P. A Carson*, 36.

J

Jenkins, G. Parry, Plea for the Reflecting Telescope, 59.

Joseph Miller Barr, C. A. C., 449.

Jupiter, T. E. R. Phillips, 284; in a Large Telescope, T. E. R. Phillips, 347.

K

Kepler, (Poem), A. D. W., 285.

Kinetic Theory of Gravitation, Charles F. Brush, 151.

Klotz, Otto, A Halo, 437; Magnetic Observations, 138; Secular Change, 141; Sterographic Projection Tables, 205; Terrestrial Magnetism, 157.

Kootenay Base, Measurement of, *P. A. Carson*, 36.

L

Life on Other Worlds, *R. G. Aitken*, 291.

*List of Books on the History of Science, 240.

M

Magnetic Observations at Agincourt, 88, 147, 228, 281, 345, 444.

Magnetic Observations at Ottawa, 138.

Mars: the Planet of Mystery, *C. A. Chant*, 408.

Measurement of Spectral Line Displacements, Errors in the, *Ralph E. DeLury*, 384.

Measuring with Invar Wires; and the Measurement of Kootenay Base, Precise, *P. A. Carson*, 36.

Mechanical Production of Streamers seen in the Solar Corona, J. A. Miller, 233.

Meetings of Society, at Toronto, 76, 128, 216, 418; at Ottawa, 78, 131, 217, 425; at Hamilton, 81, 221, 430; at Peterborough, 82, 135, 431; at Regina, 432; at Guelph, 222, 435.

Migrating Stars, 237.

Monck, W. H. S., Eclipse Cycles, 117.

Motion of Calcium Vapor Over Sunspots, Charles E. St. John, 235.

Motion of Certain Stars in Space, 148.

Musson, W. Balfour, Note on the Classification of the Chemical Type of Stars, 125.

Mystery of the Aurora, C. A. C., 155.

N

Nature of Inertia, H. A. Wilson, 237.

Newspaper Astronomy, 95.

New Stars, Professor Bickerton, 91.

Note on the Classification of the Chemical Type of Stars, *W. Balfour Musson*, 125.

Note on φ Persei, *J. B. Cannon*, 372.

Notes from the Dominion Observatory, 84, 137, 339, 437.

Notes from the Meteorological Service, 85, 143, 225, 277, 341, 439.

Notes and Queries, 92, 154, 286, 349, 449.

Nova Lacertæ, 234.

Nugent, D. B., Personal Errors of Bisection in Meridian Circle Work, 272.

Nutation, J. A. Hardcastle, 282.

O

Observations on the Aurora, *Andrew Elvins*, 242.

October Sky, Constellation of the, Hector Lang, 433.

Orbit of *b* Persei, *J. B. Cannon*, 266.

Orbit of γ Orionis, *W. E. Harper*, 16.

Orbit of σ Geminorum, *W. E. Harper*, 200.

Orbit of ω Ursæ Majoris, *T. H. Parker*, 377.

Orbits, Determination of, *L. B. Stewart*, 97.

Orbits of the Spectroscopic Components of *d* Bootis, *W. E. Harper*, 315.

Other Worlds, Life on, *R. G. Aitken*, 291.

P

Parker, T. H., Orbits of ω Ursæ Majoris, 377.

Personal Errors of Bisection in Meridian Circle Work, *D. B. Nugent*, 272.

Photograph of a Tornada, C.A.C., 449.

Place of Comet in Cosmogony, 232.

Planet of Mystery, Mars, *C. A. Chant*, 408.

Plaskett, J. S., Notes on Astrophysics, 84; Some Recent Interesting Developments in Astronomy, 245.

Plea for the Reflecting Telescope, *G. Parry Jenkins*, 59.

Possible Phase-relations between the Planets and Sun-spot Phenomena, 445.

Precise Measuring with Invar Wires; and the Measurement of Kootenay Base, *P. A. Carson*, 30.

R

Radio-Activity, C. W. Raffety, 447.

R.A.S.C. Gold Medal, C. A. C., 244.

Reflecting Telescope, Plea for the, *G. Parry Jenkins*, 59.

Report of Weather in Canada, R. F. S., 85, 143, 225, 277, 341, 439.

Rotation of Venus, 285.

Royal Meteorological Society, 446.

S

Satellites of Mars, Professor Lowell, 151.

Secular Change, *O. K.*, 141.

Shakespeare, the Astronomy of, J. A. Paterson, 435.

Some Recent Interesting Developments in Astronomy, *J. S. Plaskett*, 245.

Spectroscopic Binary 7 Camelopardalis, *W. E. Harper*, 112.

Spectroscopic Components of *d* Bootis, Orbits of the, *W. E. Harper*, 315.

Spectroscopic and Visual Binaries: An Outline of Work Done in This Field and an Indication of Its Importance, *Reynold Young*, 355.

Stars, Distances of the, F. A. McDairmid, 426.

Star Streams, 90.

Stellar Distribution and Movements, A. S. Eddington, 346.

Stellar Motion and Spectral Type, 446.

Sterographic Projection Tables, *Otto Klotz*, 205.

Stewart, L. B., Determination of Orbits, 97.

Structure of the Universe, F. Very, 445.

Sun, the, Charles G. Abbot, 448.

T

Telescopes for the Members, C. A. C., 450.

Temperature Tables, 87, 145, 227, 279, 343, 441.

Terrestrial Magnetism, *Otto Klotz*, 157.

Theory of Grazing Collisions, M. Davidson, 283.

Tidal Actions, 238.

Total Solar Eclipse of April 28, 232.

V

Vatican Observatory, 96.

W

Watson, Albert D., Calendars, Ancient and Modern, 174; Kepler, 285.

Wolf's Comet, 237.

Worlds, Evolution of, *A. T. DeLury*, 1.

Y

Young, J., Earthquake Records Toronto and Victoria, 89, 146, 230, 280, 344, 442.

Young, Reynold, Spectroscopic and Visual Binaries: An Outline of Work Done in this Field and an Indication of Its Importance, 355.
